

# Michael Rios

Victoria, TX | michael.rios.nw@gmail.com | github.com/KingNeoIV | michaelrios.dev

## PROFESSIONAL SUMMARY

---

Computer Science junior seeking a remote software engineering internship for Summer 2027, with a focus on full-stack and backend development. Built and launched PulseCheck, a live full-stack monitoring web application (React, TypeScript, FastAPI, PostgreSQL, Stripe Checkout), and delivered a client business website end-to-end as a freelance developer. Experienced with REST APIs, JWT authentication, background jobs, and deploying applications to production.

## EDUCATION

---

### Texas A&M University-Victoria

Bachelor of Science, Computer Science

GPA: 3.432 | President's List (Spring 2026) | Dean's List (Fall 2023, Spring 2026)

Victoria, TX

May 2028 (Expected)

**Relevant Coursework:** Programming Fundamentals I & II, Data Structures & Algorithms I & II, Database Systems, Object-Oriented Programming, Python Programming, Computer Organization & Architecture, App Design Using GUIs, Telecommunication & Networks, Operating Systems (in progress), Internet Computing (in progress)

## EXPERIENCE

---

### Freelance Web Developer

Toro Welding & Fabrication

May 2026 – July 2026

Texas, United States (Remote)

- Designed, built, and launched a mobile-responsive business website from client scope through deployment on a custom domain, scoring 98 for Performance and 100 for Accessibility, Best Practices, and SEO in Lighthouse (desktop).
- Gathered requirements directly from the client and iterated on design and content to match the business's brand and industrial identity.
- Built a featured-work gallery and services breakdown to showcase past jobs, then added a photo and video gallery at the client's request.
- Integrated a live Instagram feed and click-to-call contact so visitors can reach the business directly.

### AI Data Analyst / Rater

TELUS International

December 2025 – March 2026

Texas, United States (Remote)

- Evaluated audio clips, conversational transcripts, and search-engine results for clarity, coherence, relevance, and rule compliance to support improvement of speech-recognition and natural-language models.
- Completed high-volume, multi-criteria evaluation tasks under strict quality-control guidelines while maintaining consistent accuracy.

## PROJECTS

---

### PulseCheck | pulsecheck.digital

February 2025 – Present

Live Monitoring SaaS Platform

- Built and launched (August 2026) a full-stack web app that monitors cron jobs, backups, and scheduled tasks through HTTP pings and emails the owner when a job misses its check-in window.
- Implemented a background job (APScheduler) that runs every 60 seconds, flags monitors past their expected interval plus a per-monitor grace period, and limits repeat alerts.
- Designed a public ping endpoint that identifies each monitor by a secret UUID token and accepts GET or POST, so any cron tool can check in.
- Built account features including email verification, bcrypt password hashing, JWT sessions, and expiring one-time password reset links, with Pydantic input validation and per-user access control.
- Integrated Stripe Checkout with a signature-verified webhook to upgrade subscription tiers, and enforced free-tier monitor limits on the server.

**Stack:** React, TypeScript, FastAPI, Python, PostgreSQL, SQLAlchemy, Stripe, Resend, Render

### u-sell-it | github.com/KingNeoIV/u-sell-it

In Progress

Full-Stack Marketplace Platform

- Building an open-source marketplace backend with FastAPI, SQLAlchemy, JWT authentication, and PostgreSQL in a Dockerized environment; currently developing the images module and frontend integration.

## SKILLS

---

**Languages:** Python, TypeScript, JavaScript, SQL, C#, C++

**Frameworks & Tools:** React, FastAPI, Tailwind CSS, SQLAlchemy, Pydantic, Stripe API, Docker, Git/GitHub, Render, PyQt6

**Databases:** PostgreSQL, MySQL

**Systems:** Linux, Windows, macOS

**Concepts:** REST APIs, JWT Authentication, Background Jobs, Input Validation, Relational Database Design, Secure Coding

## CERTIFICATIONS

---

AI Fundamentals, Google (2026)
