Portfolio: michaelrios.dev • **GitHub:** github.com/KingNeoIV

EDUCATION

Bachelor of Science - BS, Computer Science
Texas A&M University-Victoria
Victoria, Texas, United States

August 2023 - Present

GPA: 3.403

Honors: President's List (Spring 2026), Dean's List (Fall 2023, Spring 2026)

Expected Graduation: Spring 2028

Relevant Coursework:

Programming Fundamentals I & II, Database Systems, Object-Oriented Programming, Python Programming, Data Structures & Algorithms I, Computer Organization & Architecture

WORK EXPERIENCE

AI Data Analyst/Rater,

December 2025 - March 2026

TELUS International (Contract via AI evaluation program)
Texas, United States (Remote)

- Evaluate audio clips for clarity, intent, tone, and transcription accuracy to improve speech-recognition and natural-language models.
- Assess search-engine result relevance and semantic alignment across varying query types and task formats.
- Review conversational transcripts for coherence, human-likeness, rule compliance, and contextual accuracy; generate concise summaries and select optimal AI responses.
- Complete multi-criteria evaluation tasks requiring strict adherence to linguistic, contextual, and quality-control guidelines.
- Maintain high accuracy and consistency while interpreting complex task instructions across diverse evaluation pipelines.

Freelance Web Developer,

May 2026 - July 2026

Toro Welding & Fabrication — toro-welding.com
Texas, United States (Remote)

React • TypeScript • Tailwind CSS

- Designed and shipped a full business website for a local welding and fabrication company, from client scope through launch.
- Built a featured-work gallery and a services capability breakdown to showcase past jobs and offerings.
- Integrated a live Instagram feed and click-to-call contact, delivering a site the client uses to generate real leads.
- Gathered requirements directly from the client and iterated on design and content to match the business's brand and industrial identity.

- Deployed the site to a custom domain, optimizing for fast load times and mobile responsiveness.

PROJECTS

PulseCheck

Live Monitoring SaaS Platform

Live: pulsecheck.digital

React • TypeScript • FastAPI • PostgreSQL • Stripe

Built and shipped a live SaaS product that monitors cron jobs, backups, and scheduled tasks via simple HTTP pings, emailing users the instant a job misses its check-in window.

Implemented a free tier alongside Stripe-powered paid plans, a React/TypeScript frontend, and a FastAPI backend.

u-sell-it

Full-Stack Marketplace Platform

GitHub: github.com/KingNeoIV/u-sell-it

FastAPI • Python • PostgreSQL • Docker • SQLAlchemy

Building a modern marketplace platform with a FastAPI backend, JWT authentication, PostgreSQL database, and Dockerized environment. Currently developing the images module and frontend integration.

Space Cowboy: Galactic Run

2D Hybrid Arcade Game

GitHub: github.com/KingNeoIV/Space_Cowboy_-_Galactic_Run

C# • Raylib • Game Architecture • OOP

Developing a 2D space-western hybrid shooter with modular gameplay systems, rendering, movement, and enemy logic. Core systems implemented, additional levels and features in progress.

SKILLS

Languages: Python, C++, C#, TypeScript, JavaScript, SQL • **Frameworks/Tools:** FastAPI, React, PyQt6, Raylib, SQLAlchemy, Docker, Stripe API, Git/GitHub • **Databases:** PostgreSQL, MySQL, Oracle • **Systems:** Windows, Linux, macOS • **Strengths:** Secure Coding, Modular Architecture, Data Analysis, Workflow Optimization, Analytical Reasoning
