## PROFESSIONAL SUMMARY

---

Computer Science junior with hands-on experience shipping production software, including a live SaaS platform with paid subscriptions and a client-facing business website built end-to-end. Comfortable across the full stack with React/TypeScript front ends, FastAPI/Python back ends, and PostgreSQL, and experienced turning client requirements into deployed, revenue-generating products.

## EDUCATION

---

### Texas A&M University-Victoria

Bachelor of Science, Computer Science. President's List (Spring 2026); Dean's List (Fall 2023, Spring 2026). GPA: 3.432.

Victoria, TX

May 2028 (Expected)

Relevant Coursework: Programming Fundamentals I & II, Data Structures & Algorithms I & II, Database Systems, Object-Oriented Programming, Python Programming, Computer Organization & Architecture, App Design Using GUIs, Telecommunication & Networks

## EXPERIENCE

---

### Freelance Web Developer

May 2026 – July 2026

Toro Welding & Fabrication

Texas, United States (Remote)

- Designed and shipped a full business website from client scope through launch, delivering a live site the client actively uses to generate leads.
- Built a featured-work gallery and services capability breakdown to showcase past jobs and offerings; later added a photo and video gallery section at client request.
- Integrated a live Instagram feed and click-to-call contact to connect site visitors directly with the business.
- Gathered requirements directly from the client, iterating on design and content to match the business's brand and industrial identity.
- Deployed to a custom domain with optimizations for fast load times and mobile responsiveness.

### AI Data Analyst / Rater

December 2025 – March 2026

TELUS International

Texas, United States (Remote)

- Evaluated audio clips and conversational transcripts for clarity, tone, coherence, and rule compliance to support improvement of speech-recognition and natural-language models.
- Assessed search-engine result relevance and semantic alignment across varied query types, generating summaries and selecting optimal AI responses.
- Completed high-volume, multi-criteria evaluation tasks under strict quality-control guidelines while maintaining consistent accuracy across diverse pipelines.

## PROJECTS

---

### PulseCheck pulsecheck.digital

Live Monitoring SaaS Platform

- Built and shipped a live SaaS product that monitors cron jobs, backups, and scheduled tasks via HTTP pings, alerting users when a job misses its check-in window.
- Launched publicly in August 2026 with a free tier and Stripe-powered paid subscription plans.
- Stack: React, TypeScript, FastAPI, PostgreSQL, Stripe.

### u-sell-it github.com/KingNeoIV/u-sell-it

Full-Stack Marketplace Platform

- Building a full-stack marketplace platform with a FastAPI backend, JWT authentication, PostgreSQL database, and Dockerized environment.
- Currently developing the images module and frontend integration.
- Stack: FastAPI, Python, PostgreSQL, Docker, SQLAlchemy.

### Space Cowboy: Galactic Run github.com/KingNeoIV/Space\_Cowboy\_-\_Galactic\_Run

2D Hybrid Arcade Game

- Developing a 2D space-western hybrid shooter with modular gameplay systems covering rendering, movement, and enemy logic.
- Stack: C#, Raylib, OOP.

## SKILLS

---

**Languages:** TypeScript, JavaScript, Python, SQL, C++, C#

**Frameworks & Tools:** React, FastAPI, Tailwind CSS, Docker, SQLAlchemy, Stripe API, Git/GitHub, PyQt6, Raylib

**Databases:** PostgreSQL, MySQL, Oracle

**Systems:** Windows, Linux, macOS

**Strengths:** Secure Coding, Modular Architecture, Data Analysis, Workflow Optimization, Analytical Reasoning
